We are announcing an open call for foreign artists / art groups whose scope and creation do not fall within the Czech Republic. We want to give the opportunity to authors from all over the world who were due to the coronavirus crisis, it is impossible to present their production beyond the borders of their home country. We aim to support societal dialogue through various artistic and thought approaches in the single theme *New Future*. We are looking for artists / art groups that are open to new challenges and the *New Future* theme. Artists of all kinds of media are welcome.

From the open-call the jury will select 10 artists / art groups whose works will be presented through an online platform to the general public (physical works will be transferred to a virtual environment). Through the online map we connect individual artists / art groups and present the background creation of the work through videos, interviews, etc. To the audience in the Czech Republic we will offer a virtual exhibition in the INDUSTRA ART gallery.

The application includes a completed application form with the above list of attachments. INDUSTRA ART will provide selected artists all promotion and production of the exhibition, curatorial management and artistic fee of 700 EUR.
